Momentum Harness - Men's

BD

For all-around climbers who know that time spent fiddling with leg loops and adjusting a pinching waistbelt is time wasted, the Black Diamond Momentum delivers a time-saving design for all styles of climbing. A pre-threaded Speed Adjust waistbelt buckle saves time and eliminates error when tying in, while Dual Core Construction™ puts an emphasis on comfort, even when you're posted up at a hanging belay. TrakFIT leg-loops easily adjust for cool fall days at the crag or blazing summer days on long multi-pitches, and four pressure-molded gear loops and a haul loop make this our most popular all-rounder.

Features:

- Pre-threaded Speed Adjust waistbelt buckle
- Bullhorn-shaped waistbelt built using Dual Core Construction™
- trakFIT™ adjustment for easy leg loop customization
- Adjustable rear elastic riser

- Four pressure-molded gear loops
- Haul loop
- [M] 302 g (10.7 oz)

Solution Guide Harness - Men's

Scarpa

Whether you're in the Valley making a free bid on the Captain, or pounding out pitch after pitch at the Creek, the Solution Guide is purpose built for trad climbing. By utilizing an ultra-durable construction consisting of Super Fabric - an abrasion resistant fabric that's infused with tiny guard plates—the Solution Guide can withstand day after day of rugged use.

Features:

- Ultra-durable construction built with Super Fabric
- Lightweight waistbelt and leg loops with Fusion Comfort Technology™
- Contoured fit for superior comfort and range of motion
- Fixed leg loops

- Four pressure-molded gear loops
- Fifth gear loop for extra kit
- Adjustable, releasable elastic risers
- Size Range Waist: 61-99 cm (24-39 in) Legs: 43-69 cm (17-27 in)
- Weight [M] 394 g (14 oz)

Solution Harness - Men's

BD

The Black Diamond Solution Harness provides unequalled comfort for long days spent working your project. Fusion Comfort Technology introduces three separate strands of low-profile webbing in both the fixed leg loops and waist to create superior load distribution while reducing pressure on sensitive points. Designed to fit the contours of your body, the Solution maximizes freedom of movement and comfort, without sacrificing performance.

Features:

Lightweight waistbelt with Fusion Comfort Technology™

Contoured fit for superior comfort and range of motion

Four pressure-molded gear loops

Adjustable, releasable elastic risers

Primary fabric is bluesign approved

[M] 330 g (11.64 oz)

Aero-Classic Harness

Beal

A versatile and durable harness with a traditional design and automatic adjustment buckles on the thighs.

Features:

One-size fits all harness design
385g

Automatic adjustment buckles for thighs

Four gear loops

Waist size: 60-120cm

Leg loops: 40-75cm

Ray Harness

Singing Rock

All-round 3-buckles harness suitable mainly for beginners, climbing gyms and outdoor centers due to comfortable construction, low weight and affordable price.

Features:

3 patented Rock&Lock buckles for fast and safe adjustment

very smooth tightening due to soft and durable webbing

inside mesh wicks moisture away and dries quickly in wet conditions

reinforced tie-in points for longer lifetime of the harness

4 gear loops in two sizes with a bearing capacity 5 kg
removable and adjustable rear stretch straps

Weight: 385 g (M) 13.6 oz

Top Harness

Singing Rock

Universal harness with simple design for all activities especially suitable for climbing schools, gyms, via ferrata or glacier tours.

Features:

one size fits all (from children to adults)

lightweight construction, no padding

3 Rock&Lock smart buckles for easy and fast adjustment

adjustable leg loops with Rock&Lock buckles allow the harness to be put on even with skis or crampons

reinforced tie-in point/belay loop for increased durability

tie-in point placed above the center of gravity prevents the body rotation in case of fall

color belay loop for proper tie-in

attachment point with a full strength 15 kN

1 gear loop with a load capacity 10 kg

366 g • 12.9 oz

Momentum Harness - Women's

BD

For all-around female climbers who know that time spent fiddling with leg loops and adjusting a pinching waistbelt is time wasted, the Momentum Harness delivers a time-saving design for all styles of climbing. A pre-threaded Speed Adjust waistbelt buckle saves time and eliminates error when tying in, while Dual Core Construction™ puts an emphasis on comfort, even when you're posted up at a hanging belay. TrakFIT leg-loops easily adjust for cool fall days at the crag or blazing summer days on long multi-pitches, and four pressure-molded gear loops and a haul loop make this our most popular all-rounder.

Features:

Pre-threaded Speed Adjust waistbelt buckle

Bullhorn-shaped waistbelt built using Dual Core Construction™

trakFIT™ adjustment for easy leg loop customization

Adjustable rear elastic riser

Four pressure-molded gear loops

Haul loop

Women's-specific rise

Weight [Harness only (M)] 302 g (10.7 oz)

Solution Guide Harness - Women's

BD

The Solution Guide features a women's specific rise and fit, and is purpose built for trad climbing. The Solution Guide can withstand day after day of rugged use. With four pressure molded gear loops and a fifth gear loop for your extra kit, the Solution Guide is the ultimate trad climbing workhorse.

Features:

Women's specific rise and fit

Ultra-durable construction built with Super Fabric®

Lightweight waistbelt and leg loops with Fusion Comfort Technology™

Contoured fit for superior comfort and range of motion

Fixed leg loops

Four pressure-molded gear loops

Fifth gear loop for extra kit

Adjustable, releasable elastic risers

Size Range Waist: 66-91 cm (26 - 36 in) Legs: 46 - 66 cm (18-26 in)

Weight [M] 362 g (13 oz)

Solution Harness - Women's

BD

The Solution Harness provides unequalled comfort for long days spent working your project. This harness features a women's specific rise and fit will form to your body. Fusion Comfort Technology introduces three separate strands of low-profile webbing in both the fixed leg loops and waist to create superior load distribution while reducing pressure on sensitive points. Designed to fit the contours of your body, the Solution maximizes freedom of movement and comfort, without sacrificing performance.

Features:

Lightweight waistbelt with Fusion Comfort Technology™

Women's-specific rise and fit

Four pressure-molded gear loops

Adjustable, releasable elastic risers

Primary fabric is bluesign approved

Weight [M] 330 g (11.64 oz)

Momentum Harness - Kid's

BD

A decked-out kids' harness built for up-and-coming rock monkeys, the Kids' Black Diamond Momentum packs all the features of our adult harnesses in a smaller size. Just like the adult versions, the Kids' Momentum features our Dual Core Construction, which uses two slim bands of high-tensile webbing on the outer edges of the waistbelt and a venting OpenAir foam insert in the center to offer breathable, lightweight comfort without pressure points. And for growing kids, our trakFIT leg loop adjustment system uses a simple slide adjuster to quickly and easily adjust the diameter of the leg loop and provide a wide range of fit.

Features:

Pre-threaded Speed Adjust waistbelt buckle

trakFIT™ adjustment for easy leg loop customization

Adjustable rear elastic riser

Two pressure-molded gear loops

ONE SIZE

Waist: 56-69 cm (22-27 in)

Leg: 41-51 cm (16-20 in)

Weight 240 g (8.5 oz)

Momentum Harness - Kid's Full Body

BD

Designed with the same construction as our time-tested Momentum Harnesses, the Black Diamond Momentum Kid's Full Body provides full support without sacrificing comfort for the mini-me crushers of the world. Easily adjustable with a high tie-in point, it dials in all the details with easy on and off to make gym time enjoyable for everyone. The harness allows for maximum fit adjustments for growing kids.

Features:

Easily adjustable

Easy on-off

High tie-in point keeps kids upright

Comfortable construction that minimizes pressure

points

One size fits all

Waist: 35-65 cm (14-26 in)

Leg: 51 cm max (20 in max)

Zaza Harness – Kid's

Singing Rock

Lightweight full body adjustable harness for kids without well-defined hips necessary for a standard waist belt harness.

Features:

One size fits all children with a height of 95 -130 cm and a maximum weight of 40 kg (37 - 51 in / 88 lb)

Red color textile loops for correct attachment to the harness

Three fast buckles enable very quick and easy size adjustment

Elastic straps with a plastic buckle keep harness on the body when kids are playing on the ground

Rear padding of the harness keeps shoulder straps apart and makes dressing easier

40 mm wide webbing for leg loops to provide comfort when climbing

Weight 338 g • 11.9 oz

HELMETS

Half-dome

Vision

Capitan

Penta

Half Dome Helmet - Men's

BD

The Half Dome has long been a staple for climbers worldwide. Now redesigned, the helmet features a new lower profile suspension system with a one-handed dial combined with streamlined headlamp clips for added comfort and simplicity. Finally, an updated chin strap adds more efficiency and security while on the rock.

Features:

EPS impact foam and durable ABS shell
Updated, low-profile suspension system
Streamlined, lightweight headlamp clips

One-handed fit adjustment dial
Easily adjustable chin strap

Half Dome Helmet - Women's

BD

The Half Dome has long been a staple for climbers worldwide. Now redesigned to meet a woman's needs, the Half Dome Women's helmet features a fit that caters to the shape of a female head. With a shell profile that is optimized for a ponytail, you can spend less time fiddling with your hair and more time climbing. Plus, low profile, streamlined suspension and a one-handed dial combined with streamlined headlamp clips add comfort and simplicity. A low profile chin strap provides more efficiency.

Features:

EPS impact foam and durable ABS shell
Women's-specific fit
Ponytail-friendly shell design
Lightweight headlamp clips

One-handed fit adjustment dial
Easily adjustable chin strap
50-58cm (19.7-22.8 in)

Vision Helmet - Men's

BD

The most durable foam helmet in the BD line-up, the Vision helmet features a fusion of EPP foam, an EPS foam puck, and a ABS shell, which keeps the dings and dents at bay, while remaining incredibly lightweight at just 215 grams. Improved side and back coverage add a new level of protection that meets proposed UIAA requirements, while the strategically placed ventilation ports keep the air flowing when temps are high. The suspension system and chin strap keep the Vision sleek, and the integrated headlamp clips are low-profile so they don't snag on over-the-shoulder slings and allow you to easily light the way on sends that push past the daylight hours.

Features:

EPP + EPS + ABS shell combo creates most durable foam helmet in Black Diamond line-up
Low-profile suspension system
Lightweight at 215 grams

Integrated headlamp clips
Removable / reverse Velcro pads
Available in S/M (215g and 53-59 cm) and M/L (225g and 58-63 cm)

Vision Helmet - Women's

BD

The most durable foam helmet in the BD line-up, the Vision helmet features a fusion of EPP foam, an EPS foam puck, and a ABS shell, which keeps the dings and dents at bay, while remaining incredibly lightweight at just 215 grams. Low-profile suspension system
Lightweight at 215 grams

Integrated headlamp clips
Removable / reverse Velcro pads
Available in S/M (215g and 53-59 cm) and M/L (225g and 58-63 cm)

Capitan Helmet - Men's

BD

Engineered to handle the abuse only its namesake big wall can dish out, the Capitan is BD's bomber, ultra-durable helmet, featuring added coverage on both the sides and back, while maintaining a sleek, cradle fit for all-day comfort. Featuring a 2-piece ABS shell construction that allows for an optimized fit and dual colorways, the Capitan also boasts a fusion of EPP foam and an EPS foam puck, which meets the proposed UIAA increased side and back protection requirements. The Capitan's vents provide ample breathability when temps heat up and a low-profile suspension system dials in the fit. The integrated headlamp clips with an elastic keeper on the back secure your light so you can push through the night.

Features:

EPS impact foam and durable ABS shell
Updated, low-profile suspension system
Streamlined, lightweight headlamp clips

One-handed fit adjustment dial
Easily adjustable chin strap

PENTA

BD

Penta is extremely lightweight, super-comfortable and fully ventilated climbing helmet. All this combined with a maximum head protection. For its comfort and lightweight design is ideal for use in sport climbing, mountaineering, traditional climbing or via ferrata.

Features:

Compact upper part protects the user from falling objects and still keeps low profile

Hard PC shell avoids sharp objects penetration while PS foam absorbs the impact energy

Hard PC shell also protects the bottom edge from mechanical damage

Inside padding is fully removable and washable

Eleven large vents with more than 56 cm² allow excellent ventilation

Robust headlamp clips secure any headlamp on the market

Comfortable and flexible rear retention system conforms better to any head and provides space saving storage (can be easily folded into the helmet)

Narrow straps of the retention system are very soft and light and do not press so as standard hard-plastic headbands

Soft and wide chin strap with an extended length provides maximum comfort and allows to wear a hat under the helmet

Ultra light helmet for all climbing activities

205g 7.23 oz

Size: 51 – 60 cm

SHOES

Climbing Shoes

Approach Shoes

Ice Boots

Momentum Lace Climbing Shoes **BD**

Built for unparalleled comfort during all day cragging and gym sessions, the Momentum Lace is a shoe that combines innovative technology with a classic, flat-last design. The result is an entry-level shoe that excels in performance. They've also added a micro-fiber liner to the front of the shoe to minimize stretch and maximize comfort. Designed for all-day comfort on moderate routes, boulders or gym sessions, the Momentum features a soft-flex midsole for sensitivity and lace-up adjustability, making it the perfect entry level climbing shoe.

Features:

Neutral, flat last for vertical climbing or all-day comfort

Lace entry for fit adjustability

4.3mm rubber is built for durability and molded for optimal consistency and performance

Soft flex midsole for added sensitivity and comfort

Materials in entire shoe are completely vegan

Hemp footbed

Updated knit with softer lining provides exceptional breathability and improved comfort

Softer toe rands for better fit and comfort

Updated heel rubber geometry for consistent tension

Updated midsole for improved edging ability

Momentum Climbing Shoes **BD**

With an upper fabric that consists entirely of our Engineered Knit Technology, the Momentum provides stretch where you need it, support where it matters and all-around exceptional breathability. They've also added a micro-fiber liner to the front of the shoe to minimize stretch and maximize comfort. Built for all-day comfort on moderate routes, boulders or gym sessions, the Momentum features a soft flex midsole for sensitivity and is the perfect entry level climbing shoe.

Features:

Neutral, flat last for vertical climbing or all-day comfort

Two Velcro straps for fit adjustability

4.3mm rubber is built for durability and molded for optimal consistency and performance

Soft flex midsole for added sensitivity and comfort

Materials in entire shoe are completely vegan

Hemp footbed

CHALK BAGS

Chalk Bags

Chalk Pots

Special Cases

Gym Chalk Bag - Single

BD

To keep chalk dust to a minimum, many gyms require climbers to use a chalk ball. Don't worry, the Gym Chalk Bag has you covered. With an integrated, refillable chalk ball, a brush holder and a slot for your lead certification tag, this bag is tailor-made for indoor sessions and can clip directly to your harness or you can opt to use the included chalk bag belt.

Features:

- Integrated, refillable chalk ball
- Comes with chalk bag belt and can clip directly to your harness
- Slot for lead certification tag
- Brush holder
- Weight 83 g (2.93 oz)

Mojo Chalk Bag

BD

With a classic, cylindrical design, pliable wire rim, and improved closure, the Black Diamond Mojo Chalk Bag is our go-to chalk bag for everyday functionality from the boulders to the big walls. The included webbing belt with a quick-release buckle makes for fast on and off.

Features:

- Classic cylinder shape with pliable wire rim
- Fleece-lined interior with cinching cord-lock closure
- Brush holder
- Webbing belt with quick-release buckle
- Weight [S/M] 80 g (2.82 oz)
- [M/L] 82 g (2.89 oz)

Repo Chalk Bag

BD

We built the Black Diamond Repo Chalk Bag from repurposed fabric scraps taken from our sewing factory. Now, the new Repo also features a modern, tapered shape, improved closure system, and higher quality fabric. The bag also includes a webbing belt with a quick-release buckle for easy on and off.

Features:

- Modern, tapered shape with pliable wire rim is made from repurposed materials
- Fleece-lined interior with cinching cord-lock closure
- Brush holder
- Webbing belt with quick-release buckle

Mondo Chalk Pot

BD

The BD Mondo Chalk Pot is the ultimate bouldering essential, with a stable design and magnetic closure to minimize accidental chalk dumps. Brush holders are compatible with a variety of brush sizes, a zippered pocket easily accommodates your phone and keys, and a roll top seal manages chalk when you shove the Mondo into your pack on the hike out. The "repo" or "assorted" color is built from repurposed fabric scraps from our sewing factory and comes in assorted colors. Colorway will vary due to repurposed fabric scraps. The selected color will be primary color.

Features:

- Modern, tapered shape with pliable wire rim is made from repurposed materials
- Fleece-lined interior with cinching cord-lock closure
- Brush holder
- Webbing belt with quick-release buckle

Mondito Chalk Pot

BD

A smaller, shorter, basic version of our Mondo chalk pot, the Mondito features the same lauded design, yet comes at a value. The entry is a simple roll-up design without the magnets of the Mondo, and we've included 1 brush holder and 1 pocket to store car keys and other essentials while out pebble wrestling.

Features:

1 brush holder
1 pocket

Weight 110 g (3.88 oz)

Chalk Refill

Liquid Chalk

Eco Gold Loose Chalk **BD**

Black Gold Chalk is scientifically engineered to enhance your grip. By combining Black Diamond’s classic White Gold, the most trusted chalk on the market, with 10% Pure Gold—a concentrated form of hyperabsorbent Upsalite - they’ve created Black Gold, an additive-free blend of chalk with TWICE the absorption of regular chalk.

Features:

Absorbs twice the moisture than regular chalk
Scientifically engineered to enhance your grip

Available in 100g, 200g, and 514g

White Gold Loose Chalk **BD**

Pure, uncut and ready to rock, Black Diamond’s white chalk is specifically blended for climbing to keep sweat at bay, ensuring maximum grip no matter how hot or humid it gets.

Features:

Improves grip for better climbing performance
Comes as loose chalk

Available in 100g, 200g and 300g

White Gold Chalk Shot Refill **BD**

Black Diamond’s white chalk is specifically blended for climbing to keep sweat at bay, ensuring maximum grip no matter how hot or humid it gets.

Features:

Improves grip for better climbing performance
Chalk shots are magnesium carbonate-filled mesh

balls to keep mess to a minimum
Available in 50g refillable shot and 50g non-refillable shot

Black Diamond 56g Chalk Blocks **BD**
- Box of 8

Pure, uncut and ready to rock, Black Diamond’s white chalk is specifically blended for climbing to keep sweat at bay, ensuring maximum grip no matter how hot or humid it gets.

Features:

Improves grip for better climbing performance

56g that block can be broken down to fit your chalk bag

Magnum Liquid Chalk **Singing Rock**
- 150ml

Quick-drying liquid chalk in a practical 150ml screw tube

Features:

Perfect grade natural chalk specifically designed for climbing
Creates less dust – Perfectly absorbs moisture and sweat

Ensures high friction between fingers and stone and so better grip
Highly recommended for indoor climbing
150 ml tube

ROPES AND SLINGS

Single Ropes

Half Ropes

Walking Safety

Slings

Joker 9.1MM - 60m

Beal

The JOKER 9.1MM rope is a single, double and twin rope that can be adapted to many different climbing situations. It offers the right balance between lightness, fluidity and safety to please experienced climbers and will also suit, thanks to its versatility, more traditional climbers looking for a rope that can be used for ridge running, classic, mixed or snow climbing. The JOKER rope, already famous for being the first rope to meet the 3 standards for dynamic ropes, is now more versatile for climbs in the best conditions. The strong point of this new JOKER rope is the integration of the UNICORE innovation that makes the core and sheath of this rope integral to provide greater safety and durability over time.

Antidote 10.2mm - 60m

Beal

ANTIDOTE 10.2 MM is a multipurpose rope especially designed for crag climbers. Its large diameter provides extra comfort when belaying and better resistance to abrasion. This model is also easy to handle and compact for traditional climbing.

Antipode 10.5mm - 200m

Beal

Very tough, this is the established standard rope for work at height. Same construction as the INDUSTRIE 10.5 mm. Rope is supplied on 100m reel or 200m and can be cut into 50m increments.

Karma 9.8mm - 60m

Beal

KARMA 9.8 is an intermediate rope for crags and offers an excellent compromise between performance factors to help you master small diameter ropes. It strikes a reassuring balance between slenderness and control and provides manageability and compactness for your climbs. It is an ideal rope for climbers wishing to improve.

Legend 8.3 - 60m

Beal

The LEGEND 8.3 double rope offers an ideal grip when setting out on big wall climbing or adventure terrain. Designed to be both light and fluid, it offers improved handling and control and a particularly safe and comfortable belay. A durable rope that will prove to be a great ally for your next outing

Rando 8mm - 30m

Beal

The RANDO 8MM rope is the ideal ally to ensure your safety in steep passages or on glaciers. Whether you are hiking or skiing, its features ensure your safety. Light and compact, it is available in 20 and 30 meters but also in 48 meters with a marking every 12 meters to facilitate roping.

Nylon Sport 16mm - 60m and 200m

Singing Rock

A light and strong sewn sling – much stronger than ordinary tying with knot. This is an essential part of the gear you would use for every outdoor activity. Climbers use slings straps for resting at belay stations and as protection under many different circumstances.

Features:

Weight: 48 g (60 cm) • 1.7 oz (24 in)
Material: polyamide

Strength: 22 kN
Width: 16 mm

Dyneema Express Sling

Singing Rock

A light and strong sewn sling – much stronger than ordinary tying with knot. This is an essential part of the gear you would use for every outdoor activity. Climbers use slings straps for resting at belay stations and as protection under many different circumstances.

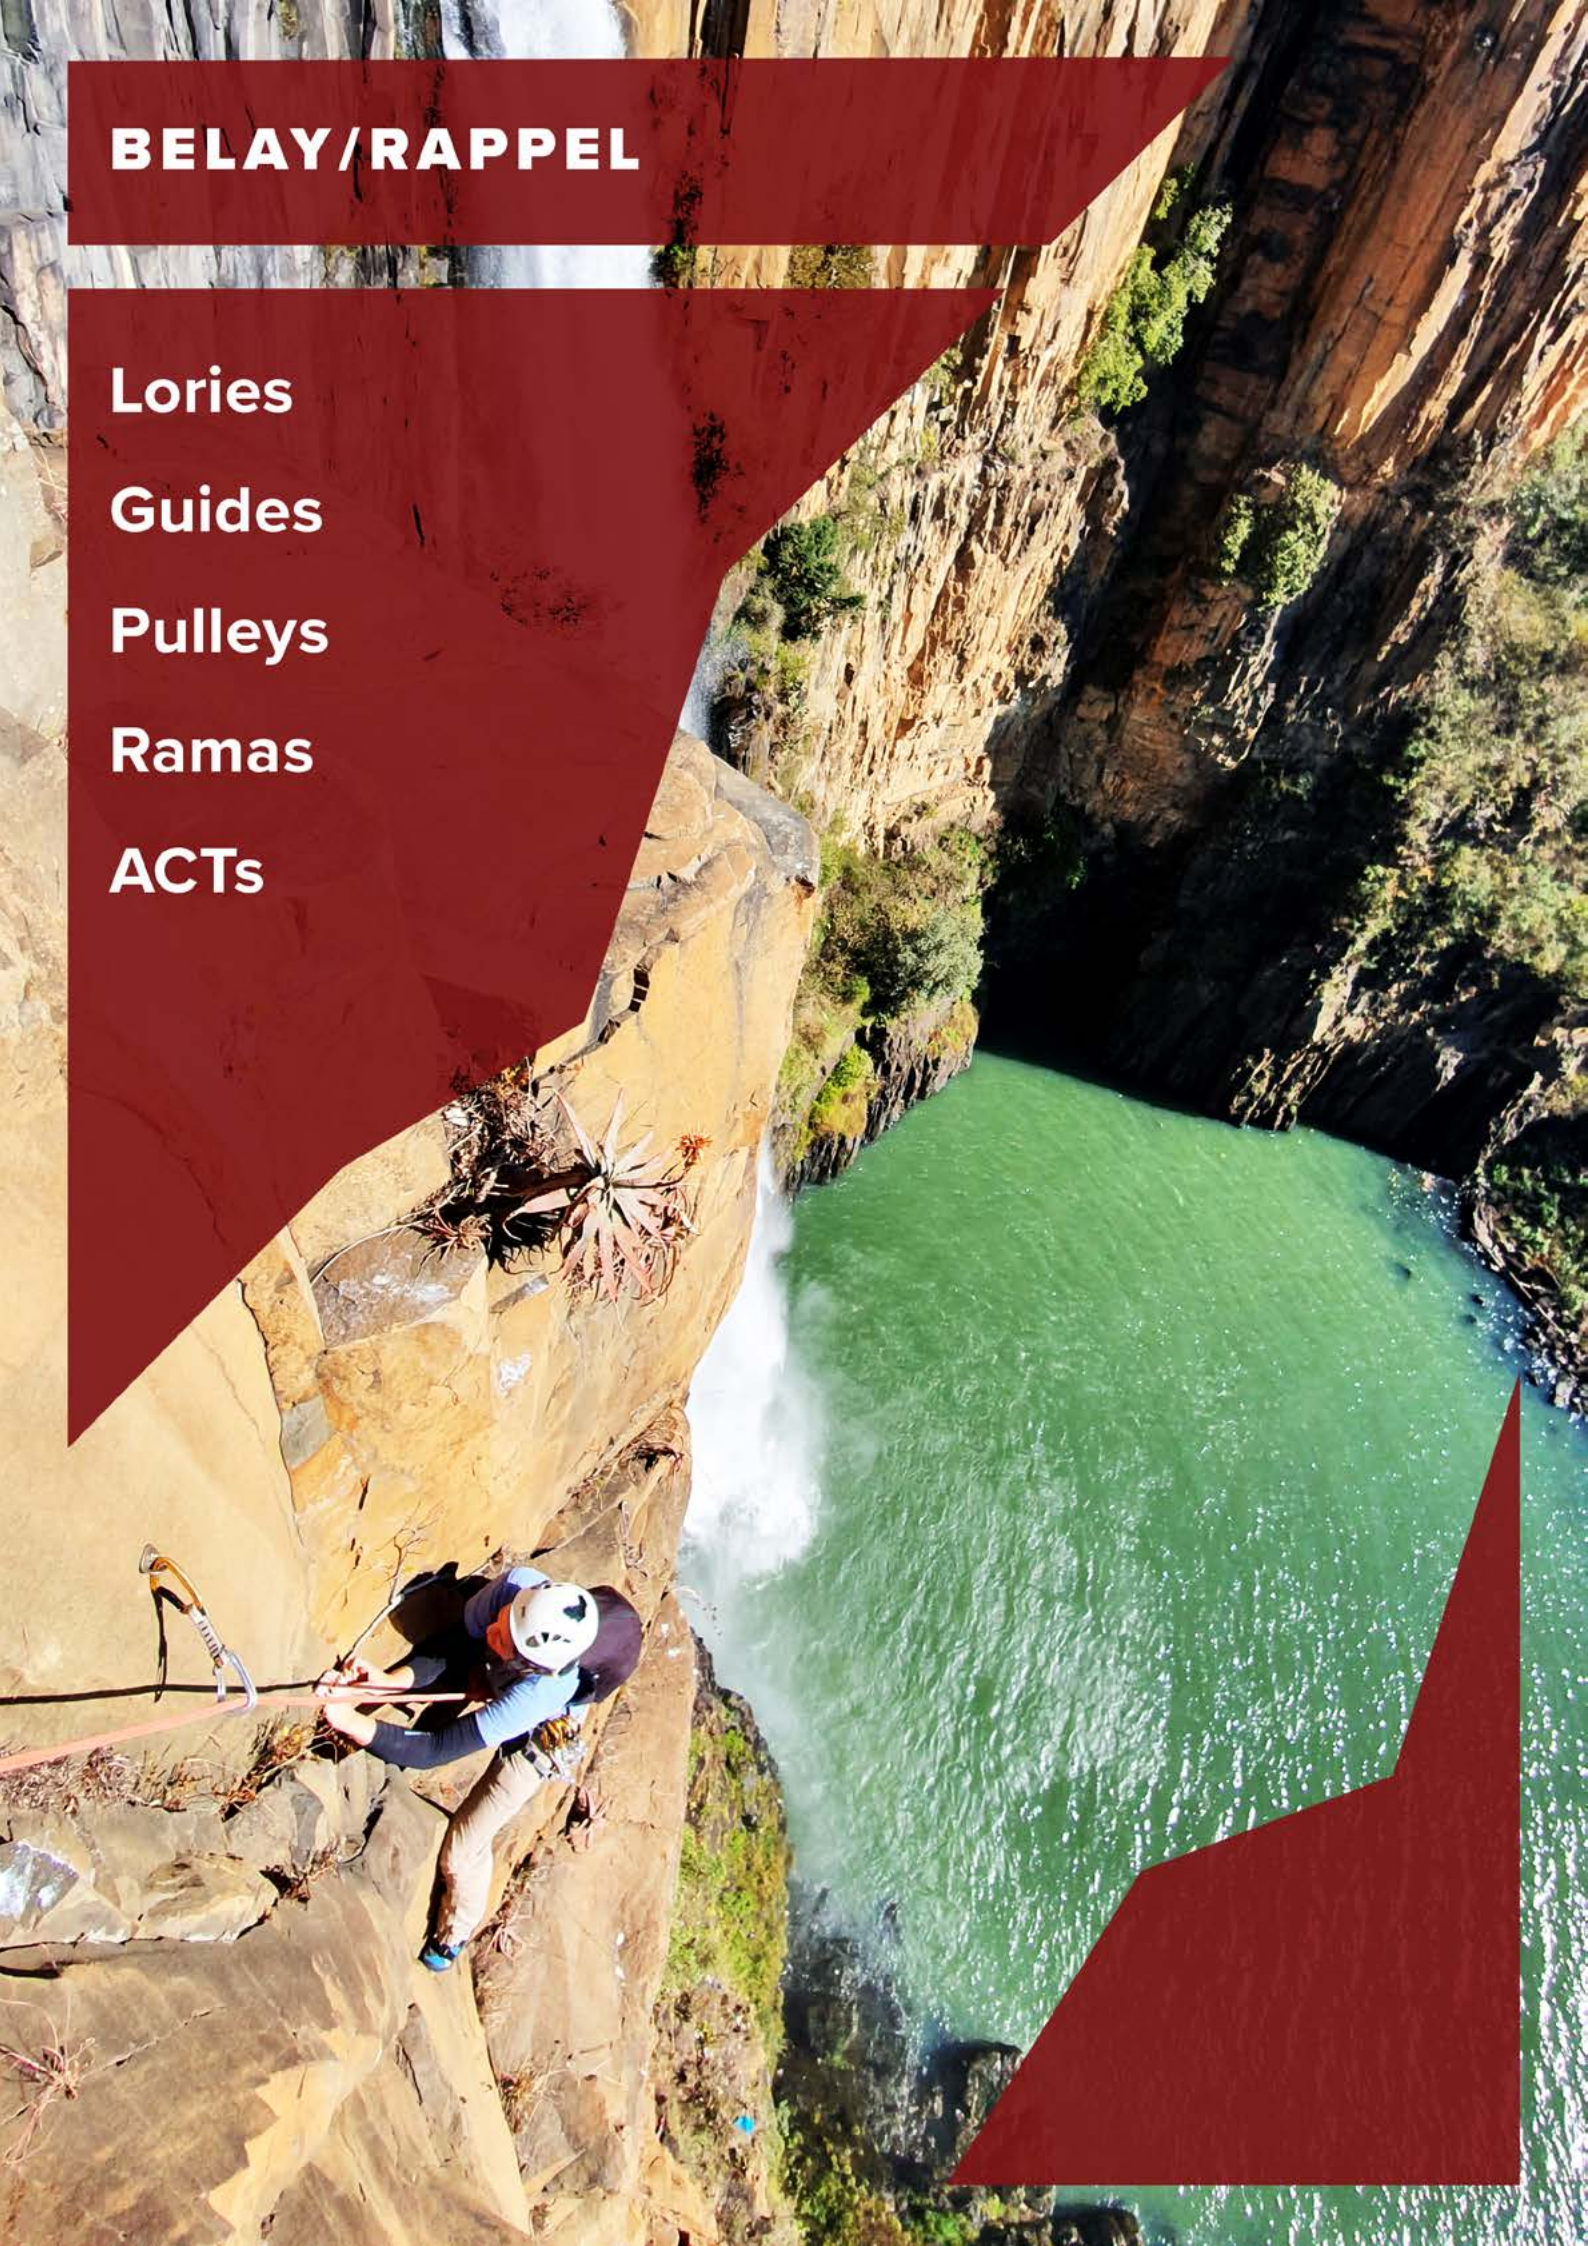

Features:

Light, thin and still very strong
Ideal for all applications where weight and strength come first
Part of the gear you use for every outdoor activity
Climbers use slings straps for resting at belay stations and

As protection under many different circumstances
For better gear management available in different colors in
The lengths range from 11cm to 150 cm

BELAY/RAPPEL

- Lories

- Pulleys
- Ramas
- ACTs

Lory - Safe

Anthron

The Lory Safe is a robust multipurpose device for use in industrial access applications. The Lory Safe incorporates a “cam lock” which keeps the cam in a locked position until released. This is particularly useful when working on a rope – bolting, rescues or work positioning. Incorporates an “anti-panic” function. Suitable for a 2 person load up to 180kg.

Features:

Suitable for work positioning and work restraint, abseiling, lowering,

Compatible with rope diameters from 9mm to 11.4mm

Lory - Smart

Anthron

The Lory Smart is a robust multipurpose device for use in industrial access and sport climbing applications. Thanks to the free floating cam, the Lory Smart functions in much the same way as other autolocking belaying devices. However it is built for the rigors of rope access & rescue – so is more versatile than standard recreational devices. Incorporates an “anti-panic” function. Suitable for a 2 person load up to 180kg.

Features:

Suitable for work positioning and work restraint, abseiling, lowering, belaying, ascending and hauling

Compatible with rope diameters from 9mm to 11.4mm

Buddy Set

Singing Rock

Light and compact BUDDY tube and BORA GP HMS screw gate Keylock carabiner with safety wire gate together create superb unit for belaying in gyms, walls, rocks and on mountains. Simply anywhere!

Features:

Safety wire gate keeps the carabiner in its proper orientation

Effectively dissipates heat

Easy manipulation with the rope

Provides silky smooth rappel

Safe double rope usage

Separates strands of rope

Easy speed regulation

For use with ropes of diameter 7.8 - 11 mm

Weight 119 g • 4.2 oz (total)

Strength 23 kN

ATC-Alpine Guide

BD

A more compact, lighter version of our versatile ATC-Guide, the ATC-Alpine Guide is built for smash and grab ascents in the mountains. At just 73 grams, this featherweight belay/rappel device is optimized for ropes between 8.1 and 8.5 millimeters in diameter yet works with ropes from 6.9 to 9mm. The oval-ized anchor-hole allows for easy feeding and pulling of rope, and the device's guide mode lets you belay one or two seconding climbers off an anchor. Multiple friction modes provide the optimal amount of stopping power when lowering or rappelling.

Features:

- Ultralight and compact at 73 grams
- Multiple friction modes for belay and rappel
- Auto-block release hole accepts small carabiners
- Optimized for ropes between 8.1 and 8.5 millimeters in diameter yet works with ropes from 6.9 to 9mm

- Durable cable holds its shape and resists getting caught up between ropes
- Guide mode works with one or two ropes
- Weight 73 g (2.58 oz)

ATC Belay/Rappel Device

BD

Often copied but never equaled, the Black Diamond ATC provides lightweight and durable belaying and rappelling performance anytime, anywhere. This classic design features a large surface area that dissipates heat when lowering or rappelling, and the smooth-handling geometry accommodates rope sizes from 7.7 mm to 11 mm. The ATC can now be ordered in specific colors.

Features:

- Unique, smooth-handling geometry
- Minimalist design is durable in all conditions
- Large surface area dissipates heat when lowering or rappelling

- Handles ropes from 7.7 to 11 mm
- Available for order by individual color
- Weight 60 g (2 oz)

ATC-XP Belay/Rappel Device

BD

Now 30% lighter than the original thanks to an updated construction and machined windows through the body, the Black Diamond ATC-XP Belay Device is a durable, versatile belay device that features multiple friction modes to handle nearly any situation or rope diameter.

Features:

- High-friction mode offers 3 times greater hold and stopping power than regular friction mode
- Machined windows through device for weight savings
- Durable cable holds its shape and resists getting caught up between ropes

- Versatile design accepts ropes from 7.7 to 11 mm
- Available for order by individual color
- Weight 64 g (2.3 oz)

ATC Belay/Rappel Device

BD

Often copied but never equaled, the Black Diamond ATC provides lightweight and durable belaying and rappelling performance anytime, anywhere. This classic design features a large surface area that dissipates heat when lowering or rappelling, and the smooth-handling geometry accommodates rope sizes from 7.7 mm to 11 mm. The ATC can now be ordered in specific colors.

Features:

- Unique, smooth-handling geometry
- Minimalist design is durable in all conditions
- Large surface area dissipates heat when lowering or rappelling

- Handles ropes from 7.7 to 11 mm
- Available for order by individual color
- Weight 60 g (2 oz)

ATC Pilot

BD

The lightweight Black Diamond ATC Pilot represents an advance in technology for the world of assisted braking devices. Providing an added level of security to your belay, the ATC Pilot threads similarly to other tubular belay devices and accommodates ropes from 8.7-10.5mm. The durable steel braking surface has no moving parts, and the smooth and secure control allows for gradual lowering. With an easy rope payout, the ATC Pilot makes single-pitch projecting burns less tiring for the belayer and more secure for the climber.

Features:

- Accommodates ropes from 8.7-10.5
- Provides an added level of security to single pitch belays
- Smooth rope payout
- Controlled lowering
- Steel construction
- Ergonomic, non-slip surface
- Single rope use
- Weight 92 g (3.25 oz)

Extra Roll Pulley

Singing Rock

Large pulley for those who need great hauling efficiency, durability and light weight. Durable and lightweight single pulley for industrial use and hauling systems for use with static and dynamic textile ropes.

Features:

- Sealed ball bearing and large diameter of the sheave provide great efficiency 94%
- Designed and optimized for use with a Prusik friction knot or any clamps
- Top attachment point accommodates up to three carabiners
- Formed side plates provides protection of rope against contact with a surrounding
- Fixed-by-forging sheave and anti dust cover of ball bearing provides great lifespan
- Side plate holes enable cleaning of the ball-bearing surroundings
- Unique production number marking
- Weight 257 g (9.1 oz)
- Strength 32 kN
- Working load 2 x 3 kN
- Max. diameter of rope 13 mm

Twin Roll Pulley

Singing Rock

Large twin pulley for those who need great hauling efficiency, durability and light weight. Durable and lightweight double pulley for industrial use and hauling systems for use with static and dynamic textile ropes.

Features:

- Sealed ball bearing and large diameter of the sheave provide great efficiency 94%
- Designed and optimized for use with a Prusik friction knot or any clamps
- Top attachment point accommodates up to three carabiners
- Formed side plates provides protection of rope against contact with a surrounding
- Fixed-by-forging sheave and anti dust cover of ball bearing provides great lifespan
- Side plate holes enable cleaning of the ball-bearing surroundings
- Unique production number marking
- Weight 421g (14.9 oz)
- Strength 36 kN
- Working load 4 x 3 kN
- Max. diameter of rope 13 mm

Single Small Pulley

Singing Rock

Small pulley for those who occasionally need to build simple hauling systems or manipulate with the objects. Essential gear for glacier tours in case of crevasse rescue.

Features:

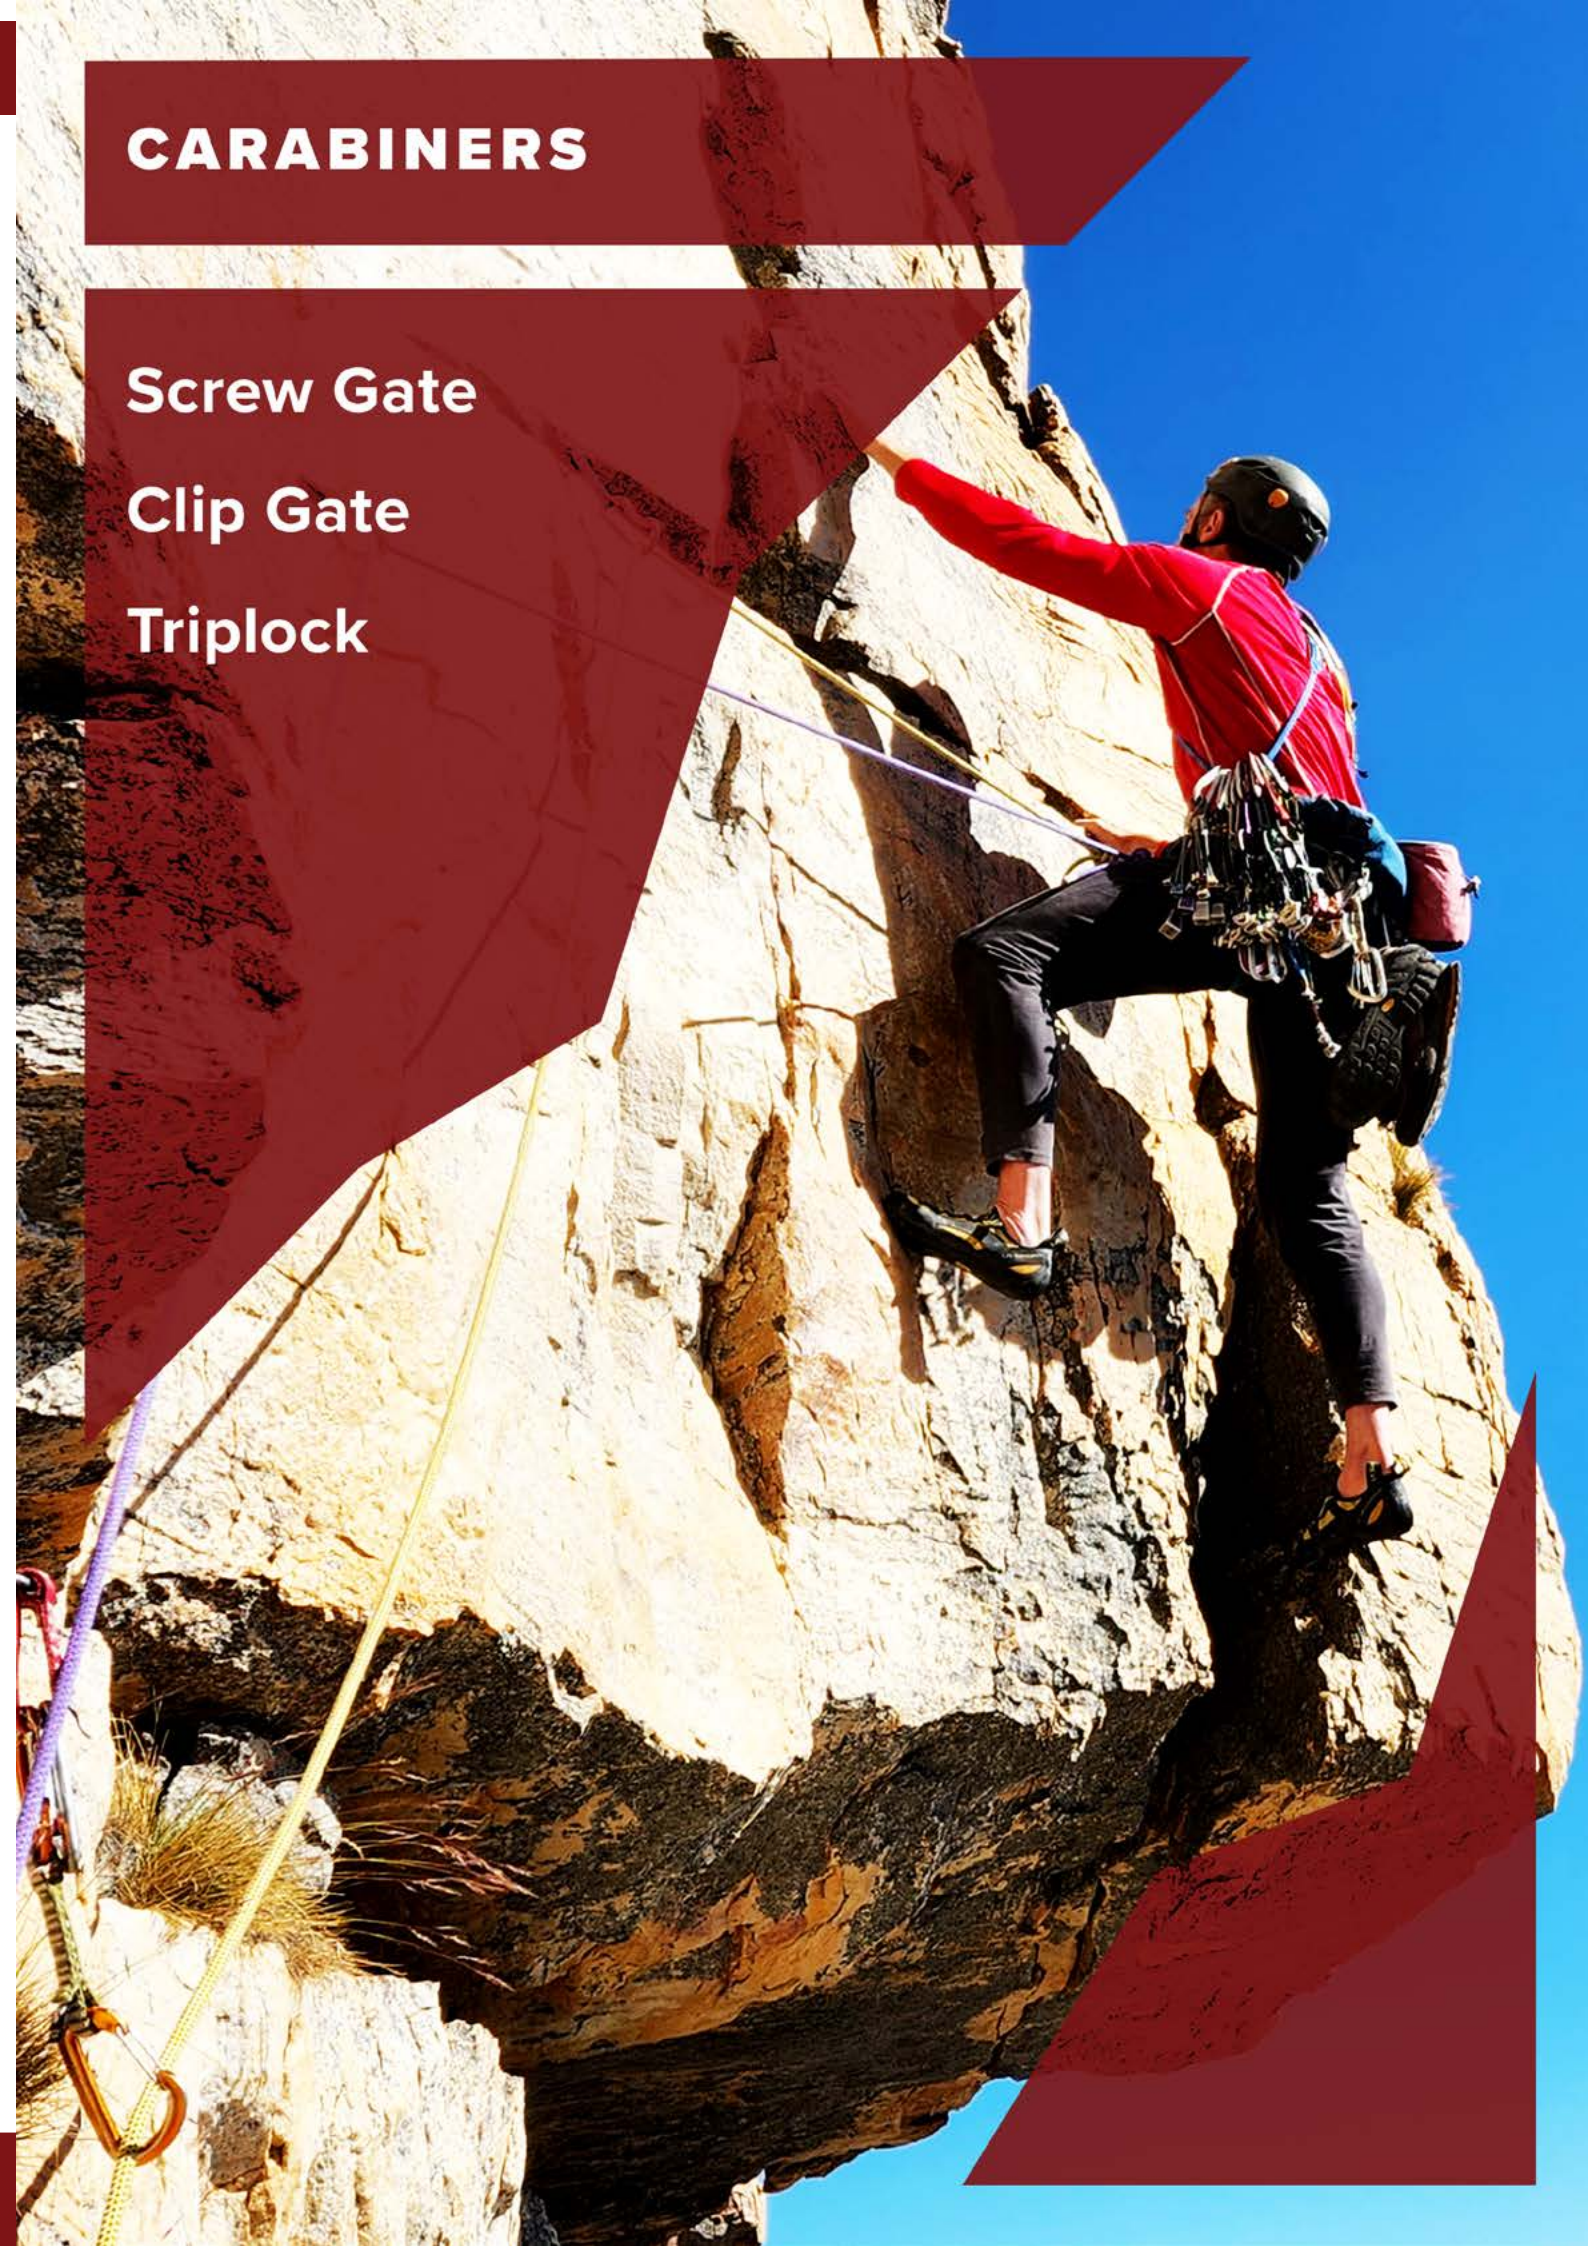

- Lightweight single pulley for hauling and rescue
- For use with static and dynamic textile ropes
- Suitable for use with a Prusik friction knot
- Bronze self lubricating bearing ensures reliable efficiency up to 81 %
- Unique production number marking
- Weight 92 g (3.3 oz)
- Strength 22 kN
- Max. diameter of rope 13 mm

CARABINERS

Screw Gate

Clip Gate

Tripllock

Tandem Pulley

Singing Rock

Double pulley for Tyrolean traverses and zip-lines with two stainless steel sheaves, each sheave is equipped with a pair of sealed ball bearings for great durability. Hard aluminium alloy body is black anodized and protects the sheaves from damage, this large attachment point can accommodate up to three carabiners. There is also a second attachment point for a back-up carabiner or tackle systems. Intended mainly for moving on a zip wire (Tyrolean traverse)

Features:

Suitable also for rescue, work and other activities at height

For use with static and dynamic ropes or with steel cables

Unique serial number

Weight 290 g • 10.2 oz

Strength 25 kN

Max. diameter of rope textile rope 13 mm, steel cable 12 mm

Rama

Singing Rock

Intuitive belay device with an enhanced braking feature designed for gym or single pitch sport climbing.

Features:

for 8.7–11 mm single ropes

reliable locking geometry provides added level of safety to your belay

operating is very simple, as it works without any moving parts or lever

large clipping area for most common carabiner shapes, works best with BORA or OXY carabiner

durable stainless steel braking surface provides longer lifetime and the smooth and secure control for gradual lowering

functionality is according to the tube principle and is therefore suitable for lead and top-rope climbing

compact geometry makes paying out rope even faster and easier, while the handle has a comfortable and firm grip

Weight 84 g (3 oz)

GridLock Screwgate Carabiner **BD**

With its revolutionary, patent-pending design made possible by our in-house hot forge, the Black Diamond GridLock Screwgate eliminates the dangers of cross loading. Designed specifically for belaying, the intuitive, easy-to-use GridLock isolates the belay loop behind its uniquely shaped gate, thereby keeping the carabiner in its proper orientation. The GridLock's I-beam spine transitions into a large, rounded rope-bearing surface for maximum strength and smooth rope feeding. Simply put, you'll never have to deal with a shifting, cross-loaded belay carabiner again.

Features:

Hot-forged construction

I-beam spine transitions into a rounded, large ropebearing surface

Intuitive and easy-to-use design

Screwgate sleeve

Patented, innovative design isolates belay loop to eliminate cross-loading

Isolates belay loop

Type H or HMS connector. For dynamic belaying using a Munter Hitch or belay device.

Weight 76 g (2.7 oz)

HotForge Screwgate Carabiner **BD**

A multi-functional, lightweight and compact keylock locker, the Black Diamond HotForge Screwgate carabiner features a hot-forge construction—allowing us to remove weight where it's not needed and add material where durability is key—and a low-profile, non-snagging nose that's easy to clip and clean. Ideal for use at belays, top roping or whenever you find yourself in need of a trusty locker, the HotForge accommodates a clove hitch and is built for everyday climbing missions that demand reliability and durability.

Features:

Accommodates a clove hitch

Hot-Forged for lighter-weight construction

Keylock nose prevents snagging

Easy-to-hold functional shape

Screwgate sleeve

Type B "Basic", locking connector

Closed Gate Strength 24 kN (5,395 lbf)

Display Weight 50 g (1.76 oz)

Gate Opening 18 mm (0.71 in)

Minor Axis Strength 8 kN (1798 lbf)

Open Gate Strength 8 kN (1798 lbf)

LiteForge Screwgate Carabiner **BD**

The LiteForge Screwgate carabiner is our ultra-light keylock screwgate built for light and fast missions. Large enough to accommodate a clove hitch and ideal for building anchors or pairing with our LINK Anchor system, the LiteForge is a dependable locker that's perfect for climbing when every gram counts.

Features:

Accommodates a clove hitch

Ideal for use with LINK Anchor system

Hot-Forged for lighter-weight construction

Keylock nose prevents snagging

Screwgate sleeve

Type B "Basic", locking connector

Closed Gate Strength 24 kN (5,395 lbf)

Gate Opening 15mm (0.6 in)

Minor Axis Strength 8 kN (1798 lbf)

Open Gate Strength 8 kN (1798 lbf)

Weight 45 g (1.59 oz)

PearLock Screwgate Carabiner **BD**

With an updated modern design blended seamlessly with a hot-forged utilitarian shape, the PearLock features a large rope-bearing surface, making it ultra-smooth for belaying, using a munter hitch, or as the brake carabiner with an ATC Guide. The classic screwlock sleeve rounds the PearLock out (pun intended) to make this carabiner an ultra-versatile workhorse.

Features:

Large rope-bearing surface for smooth operation and added longevity

Hot-Forged for lighter-weight construction

Sleeve locks on biner's gate (not nose) and won't bind up when loaded

Screwgate sleeve

Type H or HMS connector. For dynamic belaying using a Munter Hitch or belay device.

Closed Gate Strength 23 kN (5,170 lbf)

Gate Opening 22.15 mm (0.87 in)

Minor Axis Strength 8 kN (1,780 lbf)

Open Gate Strength 8 kN (1,780 lbf)

Weight 76 g (2.68 oz)

RockLock Screwgate Carabiner **BD**

Our largest belay and rappel locker, the Black Diamond RockLock carabiner features a keylock nose, is Munter Hitch compatible and can be operated with one hand.

Features:

Square hinge end holds belay loop securely in place

Slightly curved spine maximizes gate opening

Keylock nose prevents snagging

One-hand operable

Screwgate sleeve

Type H or HMS connector. For dynamic belaying using a Munter Hitch or belay device.

Closed Gate Strength 24 kN (5395 lbf)

Display Weight 85 g (3 oz)

Gate Opening 24 mm (0.95 in)

Minor Axis Strength 8 kN (1798 lbf)

Open Gate Strength 8 kN (1798 lbf)

RockLock Twistlock Carabiner **BD**

Our largest belay and rappel locker, the Black Diamond RockLock carabiner features a keylock nose, is Munter Hitch compatible and the autolocking twistlock sleeve can be operated with one hand. Now featuring a hot-forged lightweight construction, a redesigned spine for better handling, and a larger rope-bearing surface for greater durability, the RockLock is the go-to screwgate for every day climbing season after season.

Features:

Square hinge end holds belay loop securely in place

Slightly curved spine maximizes gate opening

Keylock nose prevents snagging

One-hand operable

Screwgate sleeve

Type H or HMS connector. For dynamic belaying using a Munter Hitch or belay device.

Closed Gate Strength 24 kN (5395 lbf)

Display Weight 85 g (3 oz)

Gate Opening 24 mm (0.95 in)

Minor Axis Strength 8 kN (1798 lbf)

Open Gate Strength 8 kN (1798 lbf)

Steel Oval Carabiner

Secur'em

Steel oval screw-gate

Features:

Material: High tensile steel

Action: manual screw-gate

Minimum breaking strength: 25kN

BORA / screw

Singing Rock

Versatile HMS locking biner designed for belaying, rappelling and anchor building hot-forged I-beam construction makes the carabiner extremely strong, stiff and light. A large rope bearing area allows for better rope glide and reduced wear on the carabiner and the pear-shaped basket facilitates belaying with the Munter hitch or other belay devices. The angled snag free Keylock nose allows for smooth clipping and unclipping maneuvers and the opening and basket area are large enough to easily accommodate the clove hitch.

Features:

Screw locking sleeve for great handling and effective locking

For better gear management the screw locks are in three different colors

Available also with twist and triple lock gate, all of them easy to handle

Each carabiner is individually tested for the strength 10 kN

Unique production number for better traceability and inspection

Certified for both sport and industrial use

Weight 63 g (2.22 oz)

Strength major axis 23 kN

Strength minor axis 8 kN

Strength open gate 8 kN

Gate opening (d) 22 mm

BORA GP / screw

Singing Rock

Versatile HMS locking biner designed for belaying, rappelling and anchor building hot-forged I-beam construction makes the carabiner extremely strong, stiff and light. A large rope bearing area allows for better rope glide and reduced wear on the carabiner and the pear-shaped basket facilitates belaying with the Münter hitch or other belay devices. The angled snag free Keylock nose allows for smooth clipping and unclipping maneuvers and the opening and basket area are large enough to easily accommodate the clove hitch.

Features:

Very popular for climbing gyms and ropes centres	Weight 64 g (2.26 oz)
Each carabiner is individually tested for the strength 10 kN	Strength major axis 23 kN
Unique production number for better traceability and inspection	Strength minor axis 8 kN
Certified for both sport and industrial use	Strength open gate 8 kN
	Gate opening (d) 22 mm

COLT / screw

Singing Rock

Our smallest, super light locking carabiner. Ideal for belaying and anchor building on trad and alpine climbs. The hot-forged I-beam construction makes the biner very light and still extremely strong with 11 kN gate open rating. The angled snag free Keylock nose for smooth clipping and unclipping maneuvers and the ergonomic shape and gate position designed to provide large opening and large basket area

Features:

Large rope bearing radius reduces the wear of rope	Certified for both sport and industrial use
Screw locking sleeve for great handling and effective locking	Weight 48 g (1.69 oz)
For better gear management the screw gates are in different colors	Strength major axis 26 kN
Each carabiner is individually tested for the strength 10 kN	Strength minor axis 8 kN
Unique production number for better traceability and inspection	Strength open gate 11 kN
	Gate opening (d) 18 mm

OXY BC / screw

Singing Rock

Hot-forged light alloy oval carabiner with a removable captive bar with screw gate locking. There are rough notches on the locking sleeve for easy manipulation. The captive bar keeps the carabiner in its proper orientation; the bar is easily removable with an Allen key no. 2. For functionality the angled snag free Keylock nose allows for smooth clipping and unclipping and the hot-forged I-beam construction makes the carabiner extremely strong, stiff and light. The almost oval shape makes the carabiner easy to turn around in device's attachment points, anchors or slings and thanks to the oval shape, pulleys attached are loaded symmetrically

Features:

Large rope bearing area for better rope glide and reduced wear of the carabiner	Strength major axis 26 kN
Each carabiner is individually tested for a strength of 10 kN	Strength minor axis 8 kN
Unique production number	Strength open gate 7 kN
Weight 76 g • 2.68 oz	Gate opening (d) 21 mm

HMS Steel Connector
Screw - 50kn

Singing Rock

Steel connector for work at heights.

Features:

Screw gate	Weight: 255 g • 9 oz
Keylock	Strength major axis: 50 kN
Extra strong	Strength minor axis: 13 kN
Large opening and inner space	Strength open gate: 20 kN
Designed especially for industrial use	Gate opening (d): 25 mm
Unique production number	

Oval Steel Connector Screw - 30kn

Steel connector for work at heights.

Singing Rock

Features:

Screw gate
Keylock
Oval shape
Easy manipulation
Designed especially for industrial use
Ideal for pulleys, tackles, ascenders or descenders
Unique production number

Weight: 176 g • 6.21 oz
Strength major axis: 30 kN
Strength minor axis: 9 kN
Strength open gate: 8 kN
Gate opening (d): 18 mm

HotForge Bent Gate

BD

The HotForge Bent Gate Carabiner is a modern take on our classic keylock carabiner and is a smooth operator designed for the rope-end of a quickdraw. Its bent gate is super easy to clip and the carabiner also has a huge rope-bearing surface for ultra-durability. Featuring a hot-forged construction—allowing us to remove weight where it's not needed and add material where durability is key—the HotForge has a deeper basket for better clipping, while the hinge-end basket is flatter to ensure the webbing of quickdraws stays put. The larger rope bearing surface adds durability not only for the carabiner, but for your rope as well, while the flats on the gate reduce the likelihood of the gate opening accidentally.

Features:

Hot-Forged for lighter-weight construction
Larger rope-bearing surface for added durability
Nose geometry allows for efficient unclipping

Flats on gate reduce the likelihood of gate opening accidentally
Weight 45 g (1.6 oz)

HotForge Straight Gate

BD

The HotForge Straight Gate Carabiner is a modern take on our classic keylock carabiner. Purpose built for the bolt-side of quickdraws, the HotForge is the most durable bolt-side carabiner we've ever built, while its straight gate makes clipping bolts nice and easy. Featuring a hot forged construction—allowing us to remove weight where it's not needed and add material where durability is key—the HotForge has a deeper basket for better clipping, while the hinge-end basket is flatter to ensure the webbing of quickdraws stays put. A larger rope bearing surface adds durability for the carabiner, while the flats on the gate reduce the likelihood of the gate opening accidentally. Finally, we've updated and optimized the nose geometry to allow for efficient clipping and unclipping from bolts.

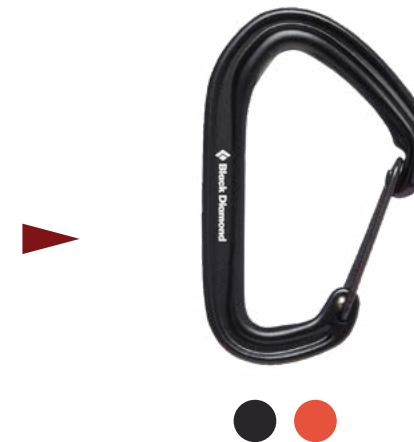

Features:

Hot Forged for lighter-weight construction
Larger rope-bearing surface for added durability
Nose geometry allows for efficient clipping and unclipping
Flats on gate reduce likelihood of gate opening accidentally

Weight 45 g (1.59 oz)
Closed Gate Strength 24 kN (5,395 lbf)
Gate Opening 22 mm (0.87 in)
Minor Axis Strength 8 kN (1,798 lbf)
Open Gate Strength 8 kN (1,798 lbf)

HotWire Carabiner

BD

Equally at home on either end of a quickdraw, racking cams or on alpine slings, the HotWire excels as a multi-use wire gate carabiner. With updated geometry and a hot-forged construction—allowing us to remove weight where it's not needed and add material where durability is key—the updated HotWire has a deeper basket for better clipping, while the hinge-end basket is flatter to hold the webbing of quickdraws more securely. A larger rope bearing surface adds durability not only for the carabiner, but for your rope as well. The HotWire is a modern classic and ideal for everything from after-work sport cragging to big-wall free climbing and long alpine ice routes.

Features:

Hot-Forged for lighter-weight construction
Larger rope-bearing surface for added durability
Lightweight and versatile size for all-around use
Does not freeze up in alpine conditions
Available as a single in three colors.

Closed Gate Strength 24 kN (5,395 lbf)
Display Weight 40 g (1.4oz)
Gate Opening 27 mm (1.06 in)
Minor Axis Strength 8 kN (1798 lbf)
Open Gate Strength 8 kN (1798 lbf)

LiteWire Carabiner

BD

The Carabiner is featuring a hot-forged construction—allowing us to remove weight where it’s not needed and add material where durability is key—and a hinge-basket that holds the sling of a Camalot adds durability not only for the carabiner, but for your rope as well, plus we’ve optimized the nose geometry to allow for efficient clipping, making the LiteWire an ultra-durable wiregate just waiting to be racked.

Features:

- Durable workhorse ideal for trad climbing
- Hot-Forged for lighter-weight construction
- Larger rope-bearing surface for added durability
- Nose geometry allows for efficient clipping/unclipping
- Closed Gate Strength 24 kN (5,395 lbf)

- Gate Opening 23 mm (0.9 in)
- Minor Axis Strength 8 kN (1,798 lbf)
- Open Gate Strength 8 kN (1,798 lbf)
- Display Weight 32 g (1.3 oz)

BORA / triple lock

Singing Rock

Versatile HMS locking biner designed for belaying, rappelling and anchor building hot-forged I-beam construction makes the carabiner extremely strong, stiff and light. A large rope bearing area allows for better rope glide and reduced wear on the carabiner and the pear-shaped basket facilitates belaying with the Münter hitch or other belay devices. The angled snag free Keylock nose allows for smooth clipping and unclipping maneuvers and the opening and basket area are large enough to easily accommodate the clove hitch.

Features:

- Triple lock gate prevents from accidental gate opening
- Available also with screw and twist lock gate, all of them easy to handle
- Each carabiner is individually tested for the strength 10 kN
- Unique production number for better traceability and inspection

- Certified for both sport and industrial use
- Weight 68 g (2.4 oz)
- Strength major axis 23 kN
- Strength minor axis 8 kN
- Strength open gate 8 kN
- Gate opening (d) 22 mm

OXY / triple lock

Singing Rock

Versatile HMS locking biner designed for belaying, rappelling and anchor building hot-forged I-beam construction makes the carabiner extremely strong, stiff and light. A large rope bearing area allows for better rope glide and reduced wear on the carabiner and the pear-shaped basket facilitates belaying with the Münter hitch or other belay devices. The angled snag free Keylock nose allows for smooth clipping and unclipping maneuvers and the opening and basket area are large enough to easily accommodate the clove hitch.

Features:

- Large rope bearing area for better rope glide and reduced wear of the carabiner
- Each carabiner is individually tested for a strength of 10 kN
- Unique production number
- Weight 81 g • 2.86 oz

- Strength major axis 26 kN
- Strength minor axis 8 kN
- Strength open gate 7 kN
- Gate opening (d) 21 mm

HMS Steel Connector Auto - 50kn

Singing Rock

Steel connector for work at heights

Features:

- Triple lock gate
- Keylock
- Extra strong
- Large opening and inner space
- Designed especially for industrial use
- Unique production number

- Weight: 267 g • 9.42 oz
- Strength major axis: 50 kN
- Strength minor axis: 13 kN
- Strength open gate: 20 kN
- Gate opening (d): 25 mm

HotForge Hybrid Quickpack - 12cm **BD**

A six pack of BDs new 12cm HotForge Hybrid draws, which features a new snag-free HotForge keylock carabiner on top and a redesigned lightweight, easy-clipping classic HotWire carabiner on bottom that's colored for a visual climbing target. The BD HotForge Hybrid Quickpack combines smooth clippability with wiregate functionality, and the 18 mm Polyester Dogbone is not only durable and easy to grab, but it features our Straitjacket insert to keep the bottom biner in the optimal clipping position.

Features:

New HotForge on top and redesigned HotWire wiregate on the bottom
Colored bottom HotWire carabiner for visual target while climbing
Snag-free keylock top biner for easy bolt clipping
Equipped with an 18 mm Polyester Dogbone with Straitjacket

Closed Gate Strength 24 kN (5,395 lbf)
Gate Opening [Top] 22 mm (0.86 in)
[Bottom] 27 mm (1.06 in)
Minor Axis Strength 8 kN (1,798 lbf)
Open Gate Strength 8 kN (1,798 lbf)
Weight [EA] 99 g (3.5 oz)

MiniWire Rackpack **BD**

Engineered for the light and fast climber that's counting every gram, the MiniWire Rackpack features six of the lightest, fully-functional carabiners in the Black Diamond line-up. Each carabiner is color-coded to match our Camalots for easy identification while racking. Perfect for minimizing weight on long trad or alpine routes, the MiniWire is durable, with a modern design, featuring a hot-forged lightweight construction, and an optimized nose geometry for easy clipping/unclipping. Go big, go MiniWire.

Features:

Color-coded to match Camalots for easy identification
Lightest fully-functional Black Diamond carabiner
Hot-Forged construction
Nose geometry allows for efficient clipping/unclipping

Weight [EA] 23 g (0.81 oz)
Closed Gate Strength 20 kN (4,496 lbf)
Gate Opening 21 mm (0.83 in)
Minor Axis Strength 7 kN (1,574 lbf)
Open Gate Strength 7 kN (1,574 lbf)

HotForge Hybrid Quickdraw 12cm **BD**

With a new snag-free HotForge keylock carabiner on top and our redesigned lightweight, easy-clipping classic HotWire carabiner on bottom that's colored for a visual climbing target, the Black Diamond HotForge Hybrid Draw combines smooth clipability with wiregate functionality. The 18 mm Polyester Dogbone is not only durable and easy to grab, but it features our Straitjacket insert to keep the bottom carabiner in the optimal clipping position.

Features:

New HotForge on top and redesigned HotWire wiregate on the bottom
Colored bottom HotWire carabiner for visual target while climbing
Snag-free keylock top carabiner for easy bolt clipping
Equipped with an 18 mm Polyester Dogbone with Straitjacket

Weight 99 g (3.5 oz)
Closed Gate Strength 24 kN (5,395 lbf)
Gate Opening [Top] 22 mm (0.86 in)
[Bottom] 27 mm (1.06 in)
Minor Axis Strength 8 kN (1,798 lbf)
Open Gate Strength 8 kN (1,798 lbf)

HotForge Hybrid Quickdraw 16cm **BD**

With a new snag-free HotForge keylock carabiner on top and our redesigned lightweight, easy-clipping classic HotWire carabiner on bottom that's colored for a visual climbing target, the Black Diamond HotForge Hybrid Draw combines smooth clipability with wiregate functionality. The 18 mm Polyester Dogbone is not only durable and easy to grab, but it features our Straitjacket insert to keep the bottom carabiner in the optimal clipping position.

Features:

New HotForge on top and redesigned HotWire wiregate on the bottom
Colored bottom HotWire carabiner for visual target while climbing
Snag-free keylock top carabiner for easy bolt clipping
Equipped with an 18 mm Polyester Dogbone with Straitjacket

Weight 104 g (3.67 oz)
Closed Gate Strength 24 kN (5,395 lbf)
Gate Opening [Top] 22 mm (0.86 in)
[Bottom] 27 mm (1.06 in)
Minor Axis Strength 8 kN (1,798 lbf)
Open Gate Strength 8 kN (1,798 lbf)

Beal Pulp 11cm Quickdraw (Set of 5)

Beal

Lightweight quickdraw for sport climbing. Its made with two wire carabiners: the SPACE WIRE at the top, and the COSMO WIRE at the bottom. The COSMO WIRE has an ergonomic shape that facilitates the rope clipping.

Features:

The RUBBINER system maintains the rope in the right axis.

16 mm tubular sling for an optimal grip, with 11 cm long.

PACKS

40-60L

50-60L

60-70L

70-80L

Rope Bags

Rocking 40

Crag climbing backpack with top and back panel easy access to the main compartment and lots of cool features. This pack comes with a large top and back panel easy access to the main compartment equipped with YKK zippers and ergonomic and comfortable shoulder straps and back panel. For functionality and extra comfort, Singing Rock's Rocking 40 allows the sternum strap and hip strap to be adjustable, and if you don't want it they can be tucked away in side pockets.

Singing Rock

Features:

zippered inside pocket with the key clip secures your keys, wallet and other small items

two internal gear loops and internal pocket for the rope tarp, climbing shoes or other equipment

120 x 140 cm rope tarp with the Partner Check infographic and different color of the loops for easy rope ends identification

zippered side pocket for quick access to a guide book, water bottle or other essentials

helmet attachment on the lid or on the front part using the flexible net

rope attachment on the lid using the rope fixing straps (the straps can be easily hidden inside the lid)

"daisy chain" loops to secure gear outside the backpack

with the loops and a bungee cord you can attach additional gear like a sleeping mat and the like (a bungee cord is not included)

reinforced carrying handles on the top part enable easy manipulation with the backpack

super durable nylon fabric with foam padding on the bottom and front panel ensures a long lifetime and protects your gear

1190g 42 oz

40 litres

Stone 45 Pack

BD

When your cragging outings call for sleek and hassle-free performance, the Black Diamond Stone 45's removable top lid and full-length side zip marry easy access with usability. A 45-liter capacity allows for organization in the alpine or at the crag, tuck-away ice-axe loops and rope strap keep your gear sorted and compression straps lock down extra equipment.

Features:

Top-loading design with drawcord skirt closure and full-length side zipper for easy access to pack contents

Removable floating top lid and tuck-away rope strap

Padded shoulder straps and removable padded waistbelt

Tuck-away ice-axe loop and top compressions straps

Creek 50 Pack

BD

Whether packing for a gear-intensive day at the Creek or a redpoint session in the Red, The Black Diamond Creek 50 features gaping top-loader capabilities, eliminating the need for push-and-shove gear packing. With ultra-durable, waterproof shell fabric protecting your equipment from the elements and a thermoformed backpanel safeguarding your bod, the Creek's haul bag-style bottom, full-length side zip and rain hood that doubles as a helmet/rope holder round it out as a crag pack to rule all crag packs.

Features:

Durable, waterproof haul-bag fabric

Load lifters, padded shoulder straps, a dual-density hip belt, and thermoformed backpanel

Top-loading design with drawcord skirt closure

Full-length side zipper for easy access to pack contents

Tuck-away rope strap and stowable rain hood that doubles as a helmet/rope holder

Zippered front flap with internal zippered organizer pockets

Haul bag-style bottom keeps pack standing upright for easy loading

Mission 55

BD

Dedicated, durable and designed for ice cragging, mixed ascents and cold-weather expeditions, the Black Diamond Mission pack is our toughest alpine pack. Featuring an updated BD X-rip 420d fabric with UTS™ coating, these packs are now ultra-durable to withstand season after season of mountain abuse. These packs also provide a balanced carry thanks to its SwingArm shoulder straps, and fully strippable waistbelt, lid and frame-sheet. The new custom metal dogbone ice tool attachment provides secure attachment for technical ice tools and mountaineering axes while a front crampon pouch and a tuck-away rope strap secure gear to the outside. Finally, a drawcord skirt provides a second defense against spindrift and light precip.

Features:

New BD "X-rip" 420d Nylon body fabric with UTS™ coating

Welded front abrasion patch for improved protection against rock, ice and crampon spikes.

New custom metal dogbone ice tool attachment with micro ice-tool PickPockets™ and removable 20 mm crampon straps

Top-loading, with removable lid, drawcord skirt closure and tuck-away rope strap

Strippable design: removable frame sheet / bivy pad and removable hipbelt with fixed webbing belt

Redesigned Shoulder Strap harness for improved comfort and durability

Moisture-wicking redesigned back-panel

Raincover available separately

Contour 60:70

Vango

The Vango Contour 60:70 rucksack is designed for backpackers and explorers on multi-night expeditions, the rucksack offers exceptional performance and fit. Recommended by The Duke of Edinburgh's Award due to its brilliantly designed Quick Adjust back system, this rucksack allows the user to customise for a perfect fit. The Contour joins Vango's Earth Collection for 2023.

Features:

Top Lid Access - With extendable gaiter and buckle closure, provides secure pack closure

Additional Zip Pocket Under Lid - Safe storage for small items

Duraflex Buckles - Strong and reliable

Detachable Rain Cover - included in the base of the pack to keep pack dry and aid visibility in low light

Hydration Compatible - Compatible with most hydration reservoirs

Ice Axe/Walking Pole Attachments - For carrying essential safety gear

Expansion Side Zip Pockets - Slim profile pack with extra storage capacity when required

Pro-weave Side Pockets - Constructed from highly durable, yet extremely flexible material. Pockets sit flush with the pack when empty. Allows easy access to essential items

Dual Side Compression Straps - Stabilise rucksack contents

Sternum Strap with Emergency Whistle - Provides a secure fit with an easy to reach whistle for safety

Reflective Points - Aids visibility in poor weather and low light conditions

Sherpa 70:80

Vango

The Vango Sherpa 70:80 rucksack is one of the most popular hiking rucksacks. Updated for 2022, Sherpa joins Vango's Earth Collection. The Sherpa is extremely practical and durable. Providing optimum fit through its Self Adjust Back System and a steady air flow through the shoulder straps due to Air Mesh, it's the perfect companion for those doing multi-day treks and activities. The Sherpa is part of the recommended kit by The Duke of Edinburgh's Award.

Features:

Top Lid Access - With extendable gaiter and buckle closure, provides secure pack closure

Additional Zip Pocket Under Lid - Safe storage for small items

Duraflex Buckles - Strong and reliable

Detachable Rain Cover - included in the base of the pack to keep pack dry and aid visibility in low light

Hydration Compatible - Compatible with most hydration reservoirs

Camalot™ Z4

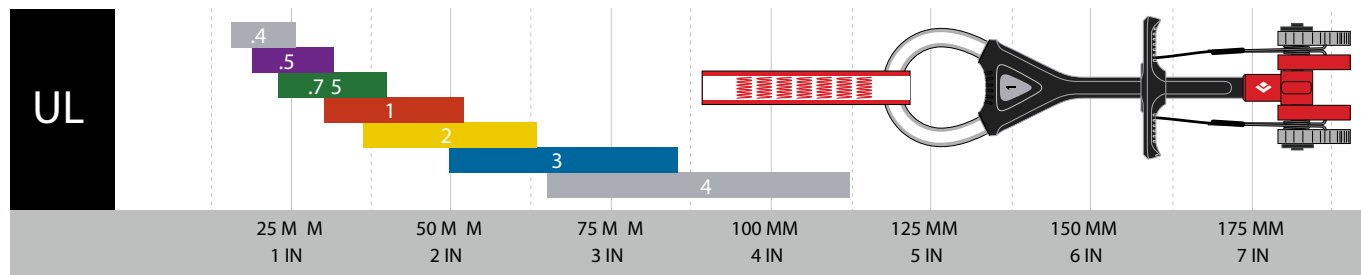

The Camalot Z4 is the realization of a dream: to have a single-stem cam that stays rigid in-hand, but flexes once placed. Featuring a similar headwidth as BD's old Camalot C3 design, but with 4 lobes that are sandblasted for better holding power, the Z4's are not only an upgrade, but are also available in smaller sizes.

Camalot™ C4

The world's best-selling, most trusted cam just got better. Now 10% lighter, the new, redesigned Camalot C4s have eclipsed Black Diamond's classic, cornerstone cams, and feature a more modern design that gives climbers everything they love about the old Camalots but add new touch-points like a wider trigger for easier handling, and our innovative trigger keeper for compact racking with sizes #4, #5 and #6.

Camalot™ UL

A breakthrough for fast-and-light missions, the Camalot™ Ultralight introduces a 25% lighter version of the world's most trusted camming device.

Camalot Z4

BD

The Camalot Z4 is the realization of a dream: to have a single-stem cam that stays rigid in-hand, but flexes once placed. Featuring a similar headwidth as BD's old Camalot C3 design, but with 4 lobes that are sandblasted for better holding power, the Z4's are not only an upgrade, but are also available in smaller sizes.

Features:

RigidFlex Trigger (patent pending) stem stays rigid in-hand for easy placement, but flexes once placed to reduce walking

OmniFlex cable construction (patent pending) for uniform flex on larger sizes; single cable construction on smaller sizes to avoid buckling and reduce trigger profile

Lightweight yet durable Dynex sling with a unique color scheme for easy identification from other Camalots

Available in sizes 0, 0.1, 0.2, 0.3, 0.4, 0.5 and 0.75

Camalot C4

BD

The world's best-selling, most trusted cam just got better. Now 10% lighter, the new, redesigned Camalot C4s have eclipsed Black Diamond's classic, cornerstone cams, and feature a more modern design that gives climbers everything they love about the old Camalots but add new touch-points like a wider trigger for easier handling, and our innovative trigger keeper for compact racking with sizes #4, #5 and #6.

Features:

Lighter sculpted lobes optimized for strength to weight

Double-axle design offers the widest range for each cam unit

C-Loop continuous cable stem design is strong and durable

Color-coded for easy identification

Available in sizes 0.3, 0.4, 0.5, 0.75, 1, 2, 3, 4, 5 and 6

Camalot UltraLight

BD

A breakthrough for fast-and-light missions, the Camalot™ Ultralight introduces a 25% lighter version of the world's most trusted camming device.

Features:

Double-axle design offers widest range for each cam unit

Dyneema core stem design is strong, durable and low-profile

14mm dyneema tape sling

Ergonomically optimized stem and thumb loop for surgically precision placements

Color-coded for easy identification

Available in sizes 0.4, 0.5, 0.75, 1, 2, 3 and 4

Stoppers

Time-tested passive pro for everything from granite walls to quartzite cragging—Stoppers are the descendants of the original chocks that started the clean climbing revolution.

Features:

- Durable aluminum heads and steel cables
- Transverse taper is versatile in flares, constrictions and parallel cracks
- Rounded edges for easy cleaning (smaller sizes are straight for better surface contact)

- Sizes 1 and 2 are for direct aid only
- Available individually in sizes 1, 2, 3, 4, 5, 6, 7, 8, 9, 10, 11, 12 & 13
- Also available in a set of 10 (#4-13)

BD

Micro-stoppers

Essential thin crack protection for aid and free climbers alike, Micro Stoppers excel in thin cracks and hairline seams.

Features:

- Copper/iron mix in heads provides bite in thin placements
- Patented swage is stronger, more flexible and less prone to fraying

- Sizes 1 and 2 are for direct aid only
- Available in sizes 1, 2, 3, 4, 5 and 6

BD

Stopper Set #4-13

BD

Stoppers No. 4-13 racked on an HotWire carabiner. Black Diamond Stoppers are an essential for every trad rack, designed with a transverse taper that permits sideways placements in flares and shallow seams. Anodized by size, they're quickly identifiable and rounded edges make for easy removal. Each Stopper is equipped with a durable, galvanized steel cable.

Features:

- Durable aluminum heads and steel cables
- Transverse taper is versatile in flares, constrictions and parallel cracks
- Rounded edges for easy cleaning (smaller sizes are straight for better surface contact)

- Strength [size 4-5] 6 kN (1349 lbf)
- [size 6-13] 10 kN (2248 lbf)
- Weight 16.74

Wired Hexentric® Set No. #4-10 **BD**

Wired Hexes No. 4-10 racked on an OvalWire carabiner. Classic, simple, lightweight, functional pro, Black Diamond Hexes shine in rapidly widening cracks where cams might walk out. With a subtly asymmetrical cross-section, flat sides and slight end-wise taper, they offer three different widths when turned on their axes and another when placed end-wise. Easy to rack and place in bottlenecks, Hexes come equipped with durable, galvanized steel cables.

Features:

Wide range of placements in all climbing conditions	Strength [size 1-3] 6 kN (1349 lbf)
6061 T-6 aluminum with swaged cables	[size 4-11] 10 kN (2248 lbf)
Display Weight 694 g (1 lb 8 oz)	Weight 25.07

BDUS Nut Tool **BD**

Free fixed nuts, retrieve deeply buried cams and crack open a cold one after a long day of cragging with the simple yet highly functional Black Diamond Nut Tool. With an angled hook on one end and a bottle-opener clip-in point on the other, the Nut Tool is an essential part of any trad rack.

Features:

Lightweight, chromoly steel	Display Weight 44 g (1.6 oz)
Bottle-opener clip-in point	

Wiregate Nut Tool **BD**

With a wiregate for easy racking and a rounded heel for pounding, The Black Diamond Wiregate Nut Tool solves problems encountered during on-route trickery.

Features:

Wiregate	Rounded heel
Machined windows	Display Weight 46 g (1.62 oz)

ICE TOOLS

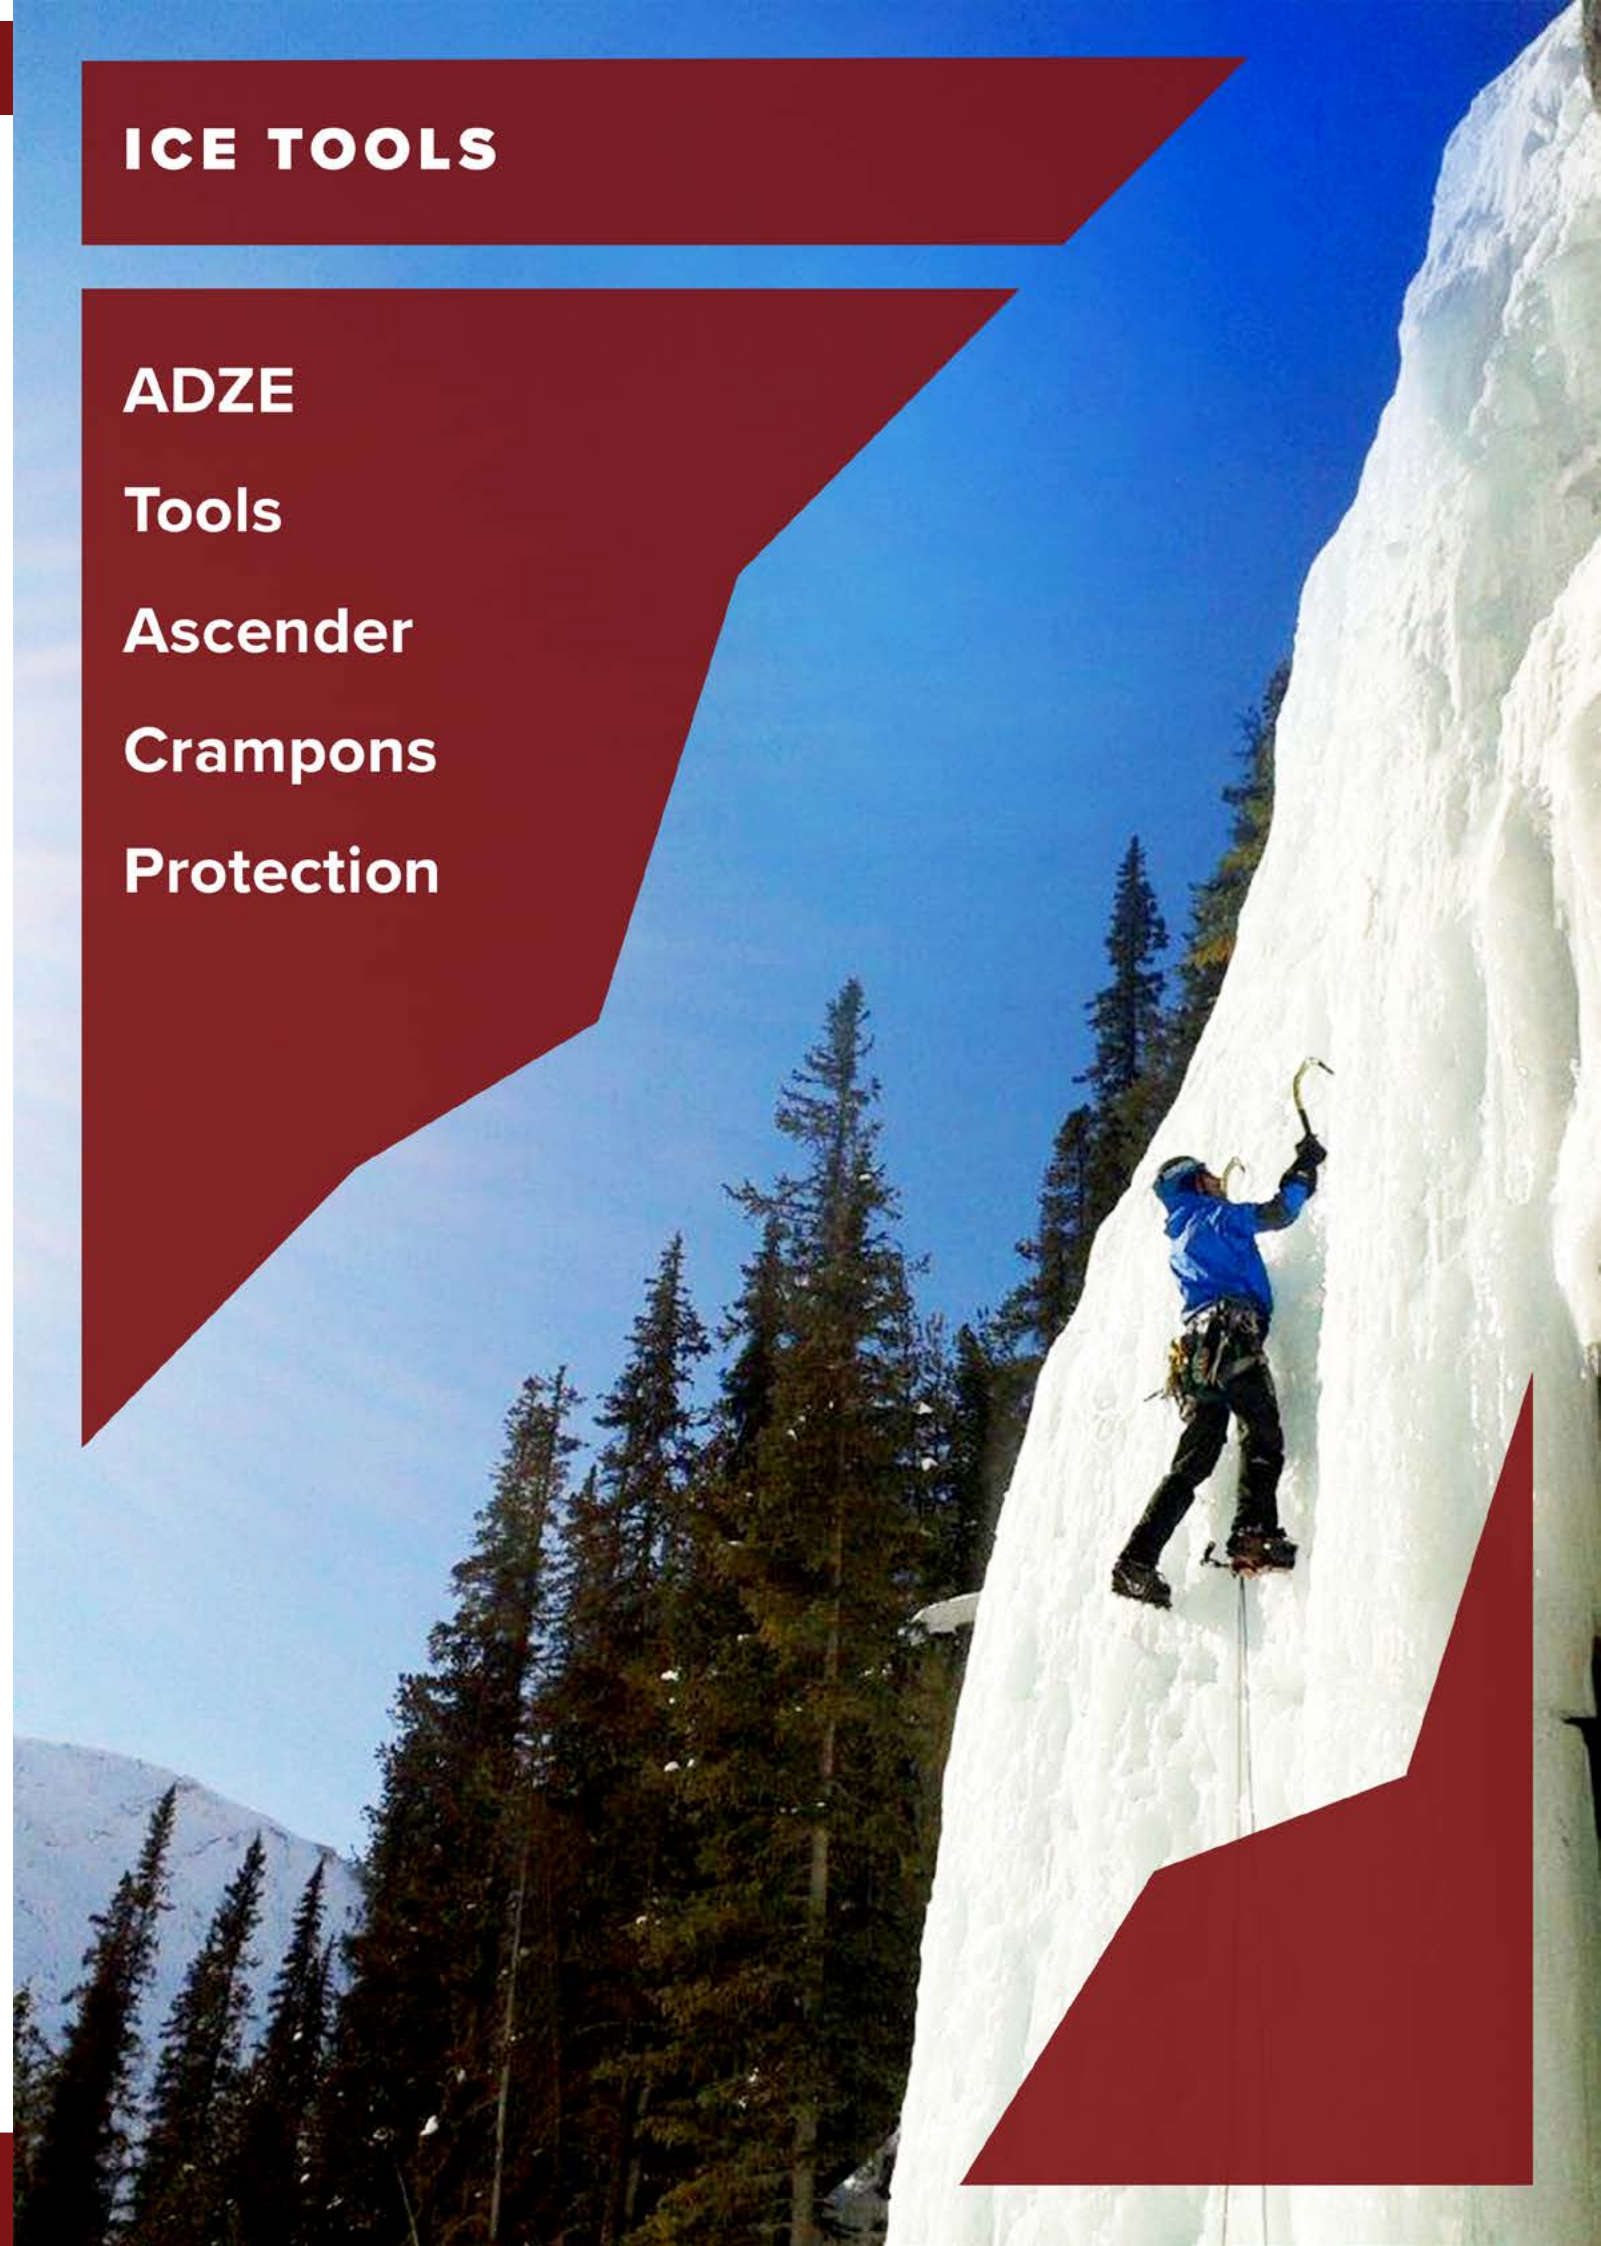

ADZE

Protection

Viper Alpine Adze

BD

A classic Black Diamond Alpine Adze, compatible with the current Viper Ice Tools and Reactor Ice Tools.

Features:

Weight 105 g (3.7 oz)

Viper Alpine Hammer

BD

A classic Black Diamond Alpine Hammer, compatible with the current Viper Ice Tools.

Features:

Weight 80 g (2.8 oz)

Lift Ascender - Left and Right

Singing Rock

Hand ascenders for safe and smooth ascent. Extra wide handle and attachment point for two carabiners will fit everyone from bigwall climbers to workers at height or special forces.

Features:

Wide lower hole allows to connect two standard carabiners

Upper hole for clipping a carabiner around the rope

Trigger with a short descent feature

Marked with a unique number

For use with ropes of diameter 8 - 13 mm:

According to EN 12841 type B, with a static rope Ø 10 - 13 mm

According to EN 567, with a rope Ø 8 - 13 mm

Weight 190 g (6.7 oz)

Max. diameter of rope 13 mm

Spinner Leash

BD

For hard, technical ice or alpine climbing where you want to climb leashless but can't risk dropping a tool, the Black Diamond Spinner Leash provides a simple and secure solution. This lightweight elastic tether system stretches for maximum reach and the locking carabiners keep your tools securely connected to your harness. A built-in swivel ensures tangle-free climbing.

Features:

Proprietary elastic webbing stretches for maximum reach and absorbs less water than nylon

Locking carabiners (non-weight bearing) attach to spike or head

Built-in swivel ensures tangle-free use

Rated to 2 kN (450 lbf)

Weight 90 g (3.17 oz)

Merlin Walking Axe

Singing Rock

Light ice axe designed for glacier tours and easy snow ascents in the mountains

Features:

classic straight shaft is made of high-quality 7075-class aluminium alloy

pick is made of durable chromoly steel and it easily penetrates even hard snow or alpine ice

adze is designed for easy cutting of steps or snow platforms

ice axe head ergonomically shaped especially for holding when walking

holes in the head as well as in the spike are big enough for attaching a carabiner

leash FIX included

compatible with BUNGEE SINGLE tether

three different lengths

Weight 455, 480, 505 g (16.05, 16.93, 17.81 oz)

Length 58, 65, 72 cm (23, 26, 28 in)

Cyborg Pro Crampons

BD

A versatile stainless steel crampon for ice and mixed climbing, the Cyborg features adjustable, replaceable frontpoints that can be configured in either dual- or monopoint. Available in a Pro or Clip version.

Features:

Distinctive stainless steel construction doesn't rust, is more durable,

Resists snow balling and saves weight

Low-profile micro-adjust heel lever offers precision fit

Adjustable, hooded frontpoints and aggressive secondary points

Includes dual-density ABS

Pro version accommodates boots with a toe welt fit

Sabretooth Pro Crampons

BD

Our best all-around crampon, the Sabretooth features a super-stable yet technical design with a redesigned stainless steel construction that's optimized for added durability.

Features:

Redesigned stainless steel construction is durable, resists snowballing and won't rust

Versatile horizontal frontpoints and technical secondary points

Low-profile micro-adjust heel bail offers precision fit

For use on a ski boot, you will want to order wide toe bails (sold separately)

Includes front and rear dual-density ABS

Pro version accommodates boots with a toe welt fit

Sabretooth Pro Crampons

Singing Rock Crampons

All-round lightweight twelve-point crampons for classic mountaineering. Designed for all terrains from glacier tours to steep snow slopes or classic ice couloirs.

Features:

Asymmetrical shape of crampons ideally adapts to the boot and the

Front points thus providing maximum efficiency in steep terrain

Lowered teeth profile provides better stability while keeps traction

Innovative Micro-Step Adjustment (MSA) system for precise fit and

Tool free adjustment

Frame is made of hardened chromoly steel

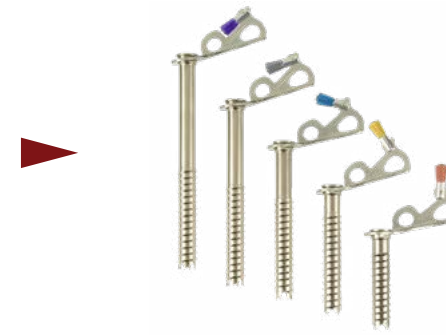

Stainless steel Rock&Lock buckle enables fast and easy fastening and

Releasing of the webbing

Singing Rock Bouncer anti-snow plates included

Express Ice Screw - 10cm

BD

The easiest and fastest placing ice screws on the planet, the Black Diamond Express Ice Screw features a tapered tube where the teeth cut a hole just larger than the tube itself, for less friction during placements. A large, color-coded crank knob makes for easy size identification and uninterrupted 360-degree motion.

Features:

Advanced tooth geometry for easier starting and faster placement

Larger crank knobs with uninterrupted 360° motion

Stainless steel hangers with two clip points

Available in five lengths, color-coded for quick indexing

CE certified, patented
